

Program 3:

#	Item	Value	Earned
1	General (All on Github)	20	
1.1	assignments folder exists		
1.2	program_3 folder exists in assignments		
1.3	apm.cpp input_data.txt output.num exists in program_3		
2	Comments	20	
2.1	Program has a comment block at the top of the the file, and one for every function.		
2.2	Name was on every page.		
3	Code	30	
3.1	Program compiles and runs.		
3.2	Make sure you implement the 3 methods: Node* Add(string val1, string val2) Node* Sub(string val1, string val2) Node* Mul(string val1, string val2)		
3.3	Each method returns a doubly linked list.		
3.4	Print method exists and writes answer to file.		
4	Correctness	30	
4.1	Output files were generated by the code.		
4.2	Answers were correct.		
4.3	Output matched requirements.		
Totals:	100	100	

- Code was printed and turned in formatted correctly:
 - Order: Code on top then output file.
 - Stapled: Upper left corner (close to the corner).
 - Your name should be on each page (NO HAND WRITING !!).
